

Antar Rezaiguia

HSE Engineer | Fire Safety & Emergency Response | Data Analytics

Algeria | antar.rezaiguia@yahoo.com | LinkedIn: Rezaiguia Antar

PROFESSIONAL SUMMARY

HSE Engineer with nearly seven years of experience in the Oil & Gas industry in Algeria, with a strong focus on firefighting, emergency response, industrial risk management, and process safety. Directly involved in real accident and incident response, on-site decision-making, and emergency simulation exercises (including PPI drills), while organizing and assigning roles to firefighting teams. Experienced in remote, isolated Oil & Gas sites in the Sahara. Alongside field expertise, developing data analytics skills (Excel, Power BI, Python) to turn HSE information into clearer, data-driven insights for safety decision-making.

PROFESSIONAL EXPERIENCE

Intervention Technician — SONATRACH

December 2019 – Present — Sahara region, Illizi

- Act in an HSE capacity: emergency response, fire and explosion risk assessment, and real incident response with on-site decision-making.
- Apply process safety methods (QRA, FERA, HAZOP) and work permit procedures in daily operations.
- Organize and assign roles to firefighting teams during PPI simulation exercises, rescue operations, and weekly emergency drills.
- Perform inspection, maintenance, and exploitation of firefighting equipment, pumps, and fire & gas systems.
- Build Excel and Power BI dashboards to turn large safety reports into clear, actionable insights.
- Self-teaching PHAST and Python to strengthen data-driven risk analysis.

HSE Engineer — ALISRAA (Construction)

2019 — 2 months

- HSE role in the construction sector, applying site safety practices in an industrial context distinct from Oil & Gas.

End-of-Study Internship — SONATRACH

May 2017 — Hassi Messaoud, Ghourd El Baguel

- Completed a Master 2 end-of-study project (thesis and defense): determined a Safety Integrity Level (SIL) for a gas turbine fire and gas system, using specialized software and mathematical equations based on historical data.

EDUCATION

Master's Degree — Industrial Risk Management

University of Batna — 2015–2017

Master's Degree — QHSE

University of Ouargla

Bachelor's Degree

University of Batna — 2012–2015

Bachelor's Degree — Technical English

University of Tébessa

CERTIFICATIONS & TRAINING

Algerian Petroleum Institute (IAP):

- First Aid — IAP Hassi Messaoud
- Intervention Techniques in the Oil & Gas Sector — IAP Skikda
- New Intervention Techniques (FROG System) — IAP Skikda
- Ionizing Radiation Risks & Prevention in Industrial Environments — IAP Boumerdès
- Intervention Vehicle Operations — IAP Skikda
- Work Permit Training — IAP

Self-Directed Learning:

Fire Science (Infinite HSE Platform) • Firefighting Pumping Systems (NFPA 20) • Safety Instrumented Systems (SIS) • Hydraulics & Instrumentation Basics • Piping Engineering • Petroleum Chemistry • Alarm Management • Power BI Series • Excel Series • Python — Level 1

TECHNICAL SKILLS

HSE & Fire Safety	Firefighting & Emergency Response, Fire & Explosion Risk Assessment and Modelling, Process Safety (QRA, FERA, HAZOP), Rescue Operations, Work Permit, Industrial & Process Safety Risk Management, Incident & Emergency Management, First Aid
Data Analytics	Excel (Intermediate), Power BI (Beginner–Intermediate), Python (Beginner), SQL (Beginner)
Languages	Arabic (Native), French (Professional), English (Professional), Spanish (A1)

SELECTED PROJECTS

Firefighters' Safety During Industrial Fire Scenarios in Oil & Gas Facilities

Technical research report on firefighter safety in industrial fire scenarios (pool, jet, flash fires, fireballs), covering heat flux, thermal radiation, TDU, Probit models, and NFPA 1971 protective equipment requirements.

More projects (HSE dashboards, data analytics, engineering studies) available on my portfolio website.
